

Post-Wildfire Restoration on Private Lands

Colorado experienced the largest wildfires in recorded history in 2020 leaving landowners asking the question, "What are the best management practices to help revegetation?". Plan to attend this two part webinar to understand options available for a successful reseeding and considerations for planting seedling trees.

Reseeding Following Wildfire

February 18, 2021, 5:30 to 7:00 p.m.

John Giordanengo, AloTerra Restoration Services.

Topics: The goals of seeding after a fire; reseeding methods; recommended seed mix; where seeding is not necessary; soil amendments are rarely needed after a fire; soil surface protection (mulch, erosion control blankets and other erosion control methods); and erosion control measures for gullies, swales, and very steep slopes.

Trees & Forest Health: Considerations for Planting Seedling Trees after Wildfire

February 25, 2021, 5:30 to 7:00

Mike Hughes, Colorado State Forest Service

Topic: Is my scorched tree dead? Where, what and when to plant seedling trees.

Free to attend, but registration is required. After registering, you will receive a link to join the webinar. https://zoom.us/meeting/register/tJwuc-iqrDwoGNO1UPpruiOf_BGM_FVre_IK
